- PROFESSIONAL EXPERIENCE
- Fullstack Developer 2025–2026

Dindin AI Platform for Mae fah luang university

Tech Stack: Docker, Nginx, Vue.js, Node.js, MongoDB, AWS Bedrock, OpenAI-compatible API, MFU SSO

- Built frontend with Vue.js and backend with Node.js
 - Designed a multi-agent system with separate roles (task analysis, execution, and summarization)
 - Implemented canonical memory to store and reuse context across interactions
 - Integrated LLM via AWS Bedrock, and exposed an OpenAI-compatible API interface for external usage via API key
 - Built an API Gateway layer to manage and route AI requests
 - Implemented MCP client to connect with external tool servers
 - Tested MCP server integration using the CCTV system (CCTVMAP)
 - Added MFU SSO for authentication
 - Deployed using Docker and configured Nginx for routing
 - Improved response flow and latency for smoother user experience
 - Used Socket.IO to deliver incremental AI outputs to the frontend in real time

CCTVMAP (CCTV Monitoring System)

Tech Stack: Docker, Nginx, Vue.js, FastAPI, MFU SSO

- Built frontend with Vue.js to display camera locations and status
 - Developed backend using FastAPI for handling camera data and APIs
 - Implemented camera status checking (ping) within the MFU internal network
 - Integrated video streaming for each camera
 - Used the system as a test environment for MCP server integration
 - Added MFU SSO for authentication
 - Deployed using Docker and configured Nginx for routing

Room Booking System

Tech Stack: Docker, Nginx, Vue.js, FastAPI, MFU Internal booking API

- Built frontend with Vue.js for browsing and booking rooms
 - Developed backend using FastAPI for handling booking logic
 - Integrated MFU internal APIs for room data and reservations
 - Implemented validation to prevent booking conflicts
 - Added authentication using MFU systems
 - Deployed using Docker and configured Nginx for routing

SKILL

Frontend: Vue, React, Next

Backend: FastAPI, Node.js

Mobile: Flutter(dart)

Database: MongoDB, Redis, ChromaDB, PostgreSQL

Tool : Postman, VSCode, Cursor, Claude code/workspace, Antigravity, Docker, nginx, Huawei Cloud, Github

EDUCATION

Mae Fah Luang university | 2022–2025

Computer Engineering

- GPA: 3.16
